INITIATIVE ON THE NEW ECONOMY - ABOUT THE PROJECT

The *Initiative on the New Economy* project of the Canadian Rural Revitalization Foundation works closely with residents, service providers, voluntary organizations, business members, and decision makers to identify factors that contribute to building capacity in rural and small town places across Canada. Capacity is the ability of people residing in a place to mobilize their assets and resources to cope with stress and transition, or to capitalize on opportunities. Such capacity is built from trust and relationships grounded in institutions, organizations, businesses, and services alike. The Initiative on the New Economy is built on four key themes to explore capacity including *local governance, communications, services, and the environment*. This report explores the relationship between services and capacity.

The Services Research theme conducted site profile surveys in the summer of 2005. This is the fourth survey conducted since 1998 with a goal to track services over time. Services play two key functions in building capacity. First, services help rural and small town places to cope with restructuring and transition as a result of economic downturns or plant closures. Job losses stemming from industrial restructuring or closure can place increased demands on local services for education and training, business development, counselling, health care, and other support services. Without such services, residents would have to cope with the additional burden of having to leave their town to access assistance. Job and service losses present a significant challenge to rural and small town places.

Second, services provide opportunities for building relationships, partnerships, and trust. Together, these can lead to new partnerships and innovative ways for delivering services where they might otherwise not exist. For example, schools or seniors' centres can act as multi-functional facilities for the community where local volunteer groups, sporting clubs, local theatre, and others can do their work. Another example might be the way that post offices can act as a one stop shop for a range of government services. This report focuses on the current service provision levels in rural and small town Canada. In particular, this report will compare the availability of services in Hussar, Alberta with services available in other research sites across Canada, as well as with services available in other study sites within Western Canada. In each of the tables in this report, the availability of services in Hussar is compared to the 24 sites surveyed across Canada and to the 9 study sites in Western Canada.

Information for this report was collected in Hussar by: Ingrid Brueckner and Diane Martz.

ABOUT THE SERVICE INVENTORY

The Canadian Rural Revitalization Foundation has been conducting research in 32 rural and small town sites from across Canada. These sites form a type of “rural observatory” in which aspects of the *Initiative on the New Economy* project may be examined. The sites participating in this project reflect the diversity of the Canadian landscape, and include forestry and mining towns, farming and fishing communities, and tourism towns. Furthermore, some of these places are located adjacent to metropolitan areas, while others are more isolated.

In the summer of 2005, researchers visited 24 sites across Canada to update a service provision inventory. This included 9 sites in Western Canada, 5 sites in Ontario, 4 sites in Québec, and 6 sites in Atlantic Canada. The population of these rural and small town places varies from 150 to 5,205 people.

AVAILABILITY

Copies of all service availability reports were distributed within the participating sites. Additionally, copies have been posted on the INE website (nre.concordia.ca) and on Greg Halseth's website (<http://web.unbc.ca/geography/faculty/greg>).

Copies of the larger *Service Provision in Rural and Small Town Canada* report are available in a number of locations. At the University of Northern British Columbia, copies have been deposited at the Weller Library or can be accessed on Greg Halseth's website: <http://web.unbc.ca/geography/faculty/greg>. Copies are also available on the Initiative of the New Economy website at: nre.concordia.ca.

**INITIATIVE ON THE NEW ECONOMY
SERVICE PROVISION IN RURAL AND SMALL TOWN PLACES: A REPORT FOR HUSSAR, ALBERTA**

Site Description - Hussar, Alberta

Located in southern Alberta, Hussar's economy is based on agriculture, oil and gas, services, and retirement. The village is 100 km east of Calgary. The population of 181 has been increasing slowly in recent years.

The expected removal of grain elevators, with the imminent closure of the CPR branchline, weighs heavily on the community. Loss of the elevators will result in a substantial reduction in the tax base for the village. The continuing struggle to retain the high school has unified a wider community, providing much of the glue holding the community together.

Farms are consolidating as farmers retire without a willing successor, or give up because of high land prices. Very large commercial private operations and Hutterite colonies compete for the land. The colonies are relatively closed communities with their own schools and social arrangements. Consolidation and considerable historical foreign ownership are weakening commerce, thinning the school population and diluting social life for Hussar.

Good road transportation, low cost housing, and lifestyle are attracting people who work elsewhere to live in Hussar. The wide open rolling topography with its grassland ecology and the large dried marshy bed of Deadhorse Lake are viewed as amenities by the citizens. The economy is restructuring as its former commercial hinterland gives way to the influence and opportunities of its adjacency to Calgary. However, Hussar has also capitalized on its recreational facilities by selling ice time at the local arena to people as far away as Calgary.

POPULATION PROFILE - HUSSAR, ALBERTA

The population of Hussar, Alberta has grown from 157 residents in 1996 to 181 residents in 2001 (Statistics Canada 2001). Overall, it still has a family oriented population that includes a substantial population of seniors. This has important implications when planning the delivery of a range of services, such as recreational, educational, health, and senior services. A challenge facing this community is youth out-migration. Of particular interest, most of the newcomers to the village have been female. Today, the gender distribution in Hussar is evenly split.

Population	Site: Hussar		
	Total	Male	Female
Population in 2001	181	90	90
Population in 1996	157	85	75
1996 to 2001 population change (%)	15.3	5.9	20.0
Total - All persons	180	90	90
Age 0-4	15	10	5
Age 5-14	25	10	15
Age 15-19	15	5	5
Age 20-24	15	5	5
Age 25-44	55	25	25
Age 45-54	20	10	10
Age 55-64	20	10	10

SERVICE PROVISION IN RURAL AND SMALL TOWN PLACES

Services play an important role in retaining and attracting residents and businesses. However, rural and small town places across Canada are experiencing tremendous change stemming from economic and social restructuring in an increasingly global economy. As a result, some small towns have been experiencing population declines. At the same time, federal and provincial government policies have been withdrawing some of the service infrastructure that can provide a foundation for revitalizing rural and small town places and assist residents to cope with stress. Some rural and small town places adjusted to transition through establishing innovative services or diversifying their local economies. These types of innovation suggest one way by which services help to build capacity within a place.

Services also help to build capacity by providing opportunities for building relationships, partnerships, and trust, which subsequently can lead to new partnerships and innovative ways for delivering services where they might otherwise not exist. Together, services can help to enhance local quality of life and mitigate out-migration.

Educational Services

Educational institutions are playing a changing role in maintaining quality of life in rural and small town places. Schools have provided other amenities through their libraries, theatres, and art galleries in places that would otherwise not have access to such services. They have also played a larger economic development role. Community colleges can provide skilled and professional workers, act as a broker of services, and act as a repository of information. They can also design programs and services that are relevant and respond to the changing labour market conditions of small places.

Table 1: Availability of Education Services - 2005

Services	NRE Sites:				Hussar: 2005	
	Canada % Yes		West % Yes		Within the Site	Within 30 Minutes

CEGEP/college	18.2	16.7	25.0	22.2	X	X

Source: CRRF NRE 2003, 2005 Site Profiles.

With the exception of community colleges, educational services are available in more sites across Canada in 2005 compared to two years ago. A greater proportion of sites in Western Canada offer a range of educational services when compared to the sites across Canada (Table 1). With the exception of community colleges, the Western Canada region has experienced a growth in the availability of educational services since 2003. Currently, Hussar is well-equipped to meet the demands of young families within its community and offers technical extension programs for

high school students. The community, however, is currently battling to retain their K-12 school. The school has received a reprieve until January. The teachers supplement their educational requirements with satellite technology; however, the community is waiting for high-speed Internet for the program to work fully. As part of the Wrap Program, high school students can also obtain credit at a technical school if they complete part of the curriculum at the high school and complete a community placement requirement. The school is also hoping to adopt the Green Certificate Program so that students can start their programming early in high school. This program was set up by Alberta Agriculture, Food and Rural Development and Alberta Learning.

Health Services

Health services play an important role in attracting new labour and retaining residents. During times of economic and social restructuring, closures in hospitals and the centralization of physical and mental health services can be difficult on the elderly and the poor who do not have access to a vehicle or who live in a place with limited transportation services. However, it is not just the utility of health services that is of concern, but also the potential loss of health care jobs that can lead to a further decline in the local economy and population.

Table 2: Availability of Health Infrastructure - 2005

Services	NRE Sites:				Hussar:

Source: CRRF NRE 2003, 2005 Site Profiles.

Health facilities are limited in most of the rural and small town places examined (Table 2). This has changed very little over the last two years. Of particular interest is that fewer than 40% of sites across Canada in 2005 have a health centre, hospital, or pharmacy. This carries important implications for residents commuting for medical emergencies or health care reasons. Sites in Western Canada are better equipped with health care facilities when compared with the national sample. At least half of the sites in Western Canada have a medical clinic. There have been few changes to other health care facilities across Western Canada over the last two years. Health services in Hussar are quite limited, with nurses holding a health clinic once a month at the seniors club, offering minor treatments. For the most part, residents travel to Bassano, Strathmore, or Drumheller for their health needs.

Table 3: Availability of Health Professionals - 2005

Services	NRE Sites:				Hussar:	
	Canada		West		2005	
	% Yes		% Yes		Within	Within
	2003	2005	2003	2005	the Site	30 Minutes

Public health nurse	31.8	37.5	50.0	66.7	✓	

Source: CRRF NRE 2003, 2005 Site Profiles.

The availability of health care professionals is also limited in small places. In fact, only home care visits are available in more than half of the sites across Canada in 2005 (Table 3). Even those services considered as essential, such as doctors, are only available in just over 41% of the sites across Canada. While health care professionals are generally more available in a higher proportion of Western Canada sites, dentists, dental surgeons, VONs, and social workers are more limited. Health care services were more limited in Hussar. Home care visits are made by a nurse from Drumheller when needed. A public health nurse is available from the Goldenhills School District for students when needed; otherwise, residents would have to travel outside of their community.

Table 4: Availability of Health Programs / Services - 2005

Services	NRE Sites:				Hussar:	
	Canada		West		2005	
	% Yes		% Yes		Within	Within

Prenatal care programs	*	39.1	*	33.3	✓	

Source: CRRF NRE 2003, 2005 Site Profiles.

* Information was not collected for this service that year.

The availability of health care programs and services is also low in the sites examined across Canada. However, new services being tracked in 2005, including prenatal care programs, are more widely available (Table 4). Health care services and programs are less widely available in sites across Western Canada compared to the national sample. In particular, while half of the sites in Western Canada had respite care in 2003, just 25% of these sites offer this service in

2005. Health services in Hussar are similarly limited compared to some of the other sites across Western Canada. Speech therapy for students is available from the Goldenhills School District and pre-natal care programs are available at the health clinic once a month.

Protection Services

Protection services contribute to community capacity in a number of ways. For example, volunteer fire departments and various crime watch programs provide opportunities for community involvement and interaction, both of which can build trust and leadership.

Table 5: Availability of Protection Services - 2005

Services	NRE Sites:				Hussar:	
	Canada		West		2005	
	% Yes		% Yes		Within	Within
	2003	2005	2003	2005	the Site	30 Minutes
Police (local/RCMP)	22.7	33.3	25.0	33.3	X	X

Alarm services	22.7	37.5	37.5	44.4	X	X
Neighbourhood watch	31.8	29.2	37.5	33.3	✓	
Rural crime watch	13.6	16.7	25.0	33.3	✓	
Victim's services – police based	*	16.7	*	33.3	X	X

Source: CRRF NRE 2003, 2005 Site Profiles.

* Information was not collected for this service that year.

Protection services are more available than most other services (Table 5). Most notably, fire departments and the 911 telephone number are available in more than half the sites across Canada. Since 2003, some sites across Canada appear to have recovered policing and fire department services. Most protection services are more available in Western Canada sites compared to the national sample. While the closest RCMP station is 41 kilometres away in Bassano, Hussar has access to a fire department and 911 emergency line service. Improvements were made to the fire department in 2004 when Hussar purchased two new fire trucks and some new equipment.

Legal Services

Legal services are another example of specialized services that are often not found in rural areas. The absence of legal services has important implications as residents must commute to go to court, to access legal services such as preparation of wills or for purchasing real estate, or to have passports or affidavits signed.

Table 6: Availability of Legal Services - 2005

Services	NRE Sites:				Hussar:	
	Canada		West		2005	
	% Yes		% Yes		Within	Within
	2003	2005	2003	2005	the Site	30 Minutes
Lawyer	18.2	16.7	12.5	11.1	X	X
Notary	40.9	45.8	50.0	55.6	✓	
Court	18.2	12.5	25.0	22.2	X	X

Source: CRRF NRE 2003, 2005 Site Profiles.

Overall, legal services are very limited in the study sites across Canada (Table 6). The availability of legal services in Western Canada sites is above the national sample. However, while more sites in Western Canada have a notary public, fewer of these sites have a lawyer or a court when compared to 2003 results. While Hussar has a notary public, residents must travel beyond 30 minutes to access other legal services.

Financial Services

Businesses also play a role in providing a range of activities that enhance the quality of life of a place, as well as the viability and stability of the local economy. Business members also play an important role in community development as they can provide leadership in, and support for, local volunteer groups. Small local businesses are also an important source for fundraising and sponsorship of specific local organizations or events.

Table 7: Availability of Financial / Business Services - 2005

Services	NRE Sites:				Hussar:	
	Canada		West		2005	
	% Yes		% Yes		Within	Within
	2003	2005	2003	2005	the Site	30 Minutes
Banks	36.4	33.3	37.5	33.3	X	X
Credit union/caisse populaire	50.0	50.0	62.5	55.6	✓	
ATM	50.0	54.2	62.5	66.7	✓	
Micro-financing	9.1	16.7	25.0	44.4	✓	
Insurance office	50.0	50.0	62.5	55.6	✓	
Industrial park	22.7	20.8	37.5	33.3	X	X
Real estate office	18.2	20.8	12.5	22.2	X	X
Accounting	50.0	50.0	50.0	44.4	✓	

Source: CRRF NRE 2003, 2005 Site Profiles.

In general, credit unions, ATMs, insurance offices, and accounting services are found in half the rural and small town sites across Canada (Table 7). The availability of these services has remained fairly stable over the last two years. In 2005, more Western Canada sites have ATMs, micro-financing, and industrial parks compared to the national sample. Fewer sites in Western Canada have an accounting office. There is a range of financial services in Hussar, including a

credit union, an ATM, micro-financing, insurance and accounting services. Banks and accounting services can be accessed more than 30 minutes away in Strathmore, Bassano or Drumheller.

Communications

Connectivity is crucial in the new economy. Communication services also allow residents to maintain contact with family and friends. With improved communication infrastructure, rural and small town places can improve local employment opportunities, and support business networks.

Table 8: Availability of Communication Services - 2005

Services	NRE Sites:				Hussar: 2005	
	Canada % Yes		West % Yes		Within the Site	Within 30 Minutes
	2003	2005	2003	2005		
Cell phone – analog	86.4	91.7	87.5	77.8	✓	
Cell phone – digital	40.9	83.3	25.0	77.8	✓	

Source: CRRF NRE 2003, 2005 Site Profiles.

Hussar residents and businesses benefit from the availability of both analog and digital cell phone service (Table 8). Overall, analog cell phone service is widely available across the study sites in Canada. Approximately 83% of the sites in the national sample also enjoy digital cell phone service. While fewer sites in Western Canada offer cell phone services compared to the national sample, there has been a substantial increase in the proportion of Western Canada sites that offer digital cell phone service compared to two years ago.

Elderly and Childcare Services

Childcare services provide an important part of the educational and care services in rural and small town places. Childcare also provides men and women with children an opportunity to participate in the labour force. Other services of importance are seniors' services including nursing homes and retirement homes. These services are particularly important given the aging of the Canadian population.

An inventory of 24 sites across Canada indicates that while many are equipped to meet the needs of young families, others are not yet well equipped with seniors' care facilities (Table 9). In contrast to the national sample, sites in Western Canada are less equipped to offer daycare and elderly services. While some unlicensed daycares operate in Hussar, residents must rely upon informal support network networks. The nearest senior citizens' home is 26 kilometres away in Standard. This may pose challenges for older residents of Hussar who may desire to stay within the community.

Table 9: Availability of Elderly and Daycare Services - 2005

Services	NRE Sites:				Hussar:	
	Canada		West		2005	
	% Yes		% Yes		Within	Within
	2003	2005	2003	2005	the Site	30 Minutes

Senior citizen's retirement home	33.3	37.5	25.0	33.3	X	✓

Source: CRRF NRE 2003, 2005 Site Profiles.

Government Services

Town halls and post offices are the most frequently available government services in rural and small town places. Post offices not only provide a service and identity, but also opportunities for routine social interaction to build relationships. Other government services play an important role in community capacity by providing a local source of expertise and knowledge upon which the community can draw.

The rural and small town sites examined across Canada do not have access to many government services (Table 10). Of particular concern to sites experiencing social and economic restructuring is that few of the sites have Employment Insurance or social assistance offices. Consequently, during restructuring or plant closures, households experiencing stress will have to go outside the site for information and assistance.

Table 10: Availability of Government Services - 2005

Services	NRE Sites:				Hussar:	
	Canada		West		2005	
	% Yes		% Yes		Within	Within
	2003	2005	2003	2005	the Site	30 Minutes
Employment Insurance	4.5	4.2	0.0	0.0	X	X
Provincial auto license office	18.2	16.7	50.0	44.4	X	✓
Social assistance office	22.7	16.7	37.5	22.2	X	X
Town hall	68.2	70.8	87.5	88.9	✓	
Post office	81.8	83.3	100.0	100.0	✓	

Source: CRRF NRE 2003, 2005 Site Profiles.

With the exception of Employment Insurance, more sites in Western Canada offer a range of government services to households experiencing economic and social restructuring compared to the national sample. However, fewer sites in Western Canada have a social assistance office compared to two years ago. Residents in Hussar must travel to Strathmore or Drumheller for these services, although auto licensing is available in Standard. Other government services are available locally including a town hall and a post office.

Community Services

Community services can provide an important foundation from which to build relationships, and can be important sources to draw upon during times of economic and social stress. The availability of community services in rural and small town places varies considerably (Table 11). While fewer sites across Canada have a second hand stores compared to two years ago, more sites in the national sample offer clothing depots and senior drop-in centres.

Table 11: Availability of Community Services - 2005

* Information was not collected for this service that year.

Overall, sites in Western Canada were able to offer more community services when compared to all the sites across Canada. In fact, the availability of clothing depots has increased in the Western Canada sites since 2003. At least half of these sites continue to have a senior's drop-in centre or a church. A concern may stem from the decline in Western Canada sites of drop-in centres for seniors since 2003. These centres provide opportunities for interaction and help to foster a sense of community. While Hussar has a senior's drop-in centre as well as a church offering counseling services, residents must travel 50 kilometres away to Strathmore or Drumheller to access other community services. The distances from these services to Hussar may present a challenge to current residents during times of economic and/or social change and may inhibit new residents from moving to the community.

Transportation

Transportation infrastructure can have important implications not only for attracting economic activity to a place, but also for enhancing the quality of life of vulnerable groups in rural and small town places. Transportation services, especially freight services, can play an important role in attracting industry by providing additional options to export products. However, without

adequate, affordable transportation options, mobility can be difficult for women, seniors, or those with disabilities to move within the community and to access services in adjacent centres. Being mobile enables citizens to have access to services, to be involved in the community, to develop local friendship ties and support networks, and to experience social activities.

The higher availability of gas stations and automobile repair services in these places reflects Canada's general reliance on the automobile (Table 12). Other transportation services are less frequently available, most notably local transit service, passenger rail service, and airport service.

Table 12: Availability of Transport Services - 2005

Source: CRRF NRE 2003, 2005 Site Profiles.

When compared to sites across Canada, more Western Canada sites have an inter-community bus station, freight train service, an airport, helicopter port, taxi, and automobile repair shops. However, fewer Western sites have a boat or ferry terminal. While local automobile services remain stable in these communities, fewer sites in Western Canada offer freight services compared to the 2003 results. A Greyhound bus is made available for seniors to commute to activities in Strathmore. Other residents may rely on their own automobile for transportation. This may pose a number of concerns for retaining residents over time. Potential industrial development may be impeded with the imminent closure of the CPR branchline.

Recreation Services

When examining all of the sites, recreational services show the greatest range of availability compared to any other service category (Table 13). This bodes well for the retention and attraction of residents, as well as the overall quality of life of these places. More notable recreational services available include community playing fields, community centres, libraries, municipal parks, hiking trails, and campgrounds. Many of these services can be important places where events can foster a sense of community. Across Canada, most sites are also able to offer either an indoor skating rink or a community gym. Recreational services less frequently available across Canada include fitness facilities, such as athletic clubs and swimming pools, as well as entertainment features such as cinemas. Since 2003, live theatre and tennis courts are

found in more sites in the national sample. Declines in recreational services between 2003 and 2005 in the national sample include outdoor municipal swimming pools and skiing trails.

In 2005, a greater proportion of sites in Western Canada offer recreational amenities such as curling rinks, indoor municipal skating rinks, community gym, municipal athletic club, live theatre, municipal parks, golf courses, and campgrounds. However, the availability of other amenities, such as public libraries, outdoor municipal skating rinks, and provincial parks are more limited compared to the national sample. Hussar residents have access to a range of recreational amenities such as a new arena, curling rink, municipal athletic club, school gym, museum and library. The community received funding from the NHL Players Association to install new boards in their arena. There is also an expansion built onto the curling rink next to the arena.

Shopping

Shopping services contribute to the success of the local economy and are considered to be an important gauge of economic health of rural and small town places. Shopping is also an important recreational activity and provides opportunities for social interaction. Low levels of shopping services can lead to out-of-town shopping and perhaps even out-migration.

Table 14: Availability of Basic Shopping Services - 2005

Services	NRE Sites:				Hussar:	
	Canada		West		2005	
	% Yes		% Yes		Within	Within

Bakery	27.3	37.5	25.0	44.4	X	X

Source: CRRF NRE 2003, 2005 Site Profiles.

The service inventory indicates that most sites across Canada are able to offer shopping services that residents would need to access on a more frequent basis, such as grocery stores (Table 14). In fact, basic shopping services have been increasing in the 24 sites examined in the national inventory. While a lower proportion of sites in Western Canada have a farmer's market, a greater proportion of these sites have a grocery store and a liquor store. Hussar residents have access to a grocery and liquor store locally. The closest farmer's market and bakery is located beyond thirty minutes in either Strathmore or Drumheller. For more specialized shopping services, residents must travel to Drumheller or Calgary.

Economic Development Organizations

Economic development organizations can play an important role in promoting the community to attract not only additional businesses, but also to attract a wider population base. While there is not a wide range of economic development organizations in these sites, it is particularly critical to note that only approximately 20% of the sites across Canada have a Chamber of Commerce (Table 15). As these organizations are comprised of local business individuals, they are important sources to draw upon during economic and social change. On the other hand, more sites in the national sample offer financial and business consulting services compared to two years ago.

Economic development organizations are more widely available in the Western Canada sites compared to the national sample. In fact, there has been an increase in the proportion of Western Canada sites that have a Community Futures or a financial or business consulting group since 2003. More notable declines occurred, though, with the availability of local business development corporations and tourism associations in these sites. Hussar residents must access most types of economic development organizations in Strathmore, Drumheller or Calgary. Financial/business consulting is available at the credit union.

Housing

Housing has been used as an incentive to attract residents to rural and small town places. However, lack of housing options as a population changes, or ages, can be a problem and can lead to out-migration. Housing options can improve the quality of life of residents, especially the more vulnerable citizens, including senior citizens or those with disabilities.

Table 16: Availability of Social Housing Services - 2005

Source: CRRF NRE 2003, 2005 Site Profiles.

Although, social housing does not appear to be widely available in sites across Canada, there have been some important changes (Table 16). Most notably, there has been an increase in the availability of assisted or subsidized housing for seniors from approximately 32% of the sites across Canada in 2003 to 50% in 2005. In Western Canada, more sites have all types of social

housing compared to the national sample. In this context, while there has been a decline in Western Canada sites that have co-op housing, a greater proportion of these sites have assisted or subsidized housing for seniors compared to two years ago. As Hussar does not possess social housing options, vulnerable residents may be inclined to leave the community.

Challenges and Opportunities for Hussar, Alberta

As Hussar faces on-going changes within its community, it has a foundation of services that enable residents to cope with change. A challenge for Hussar has been limited access to health care services and government services, particularly during economic and social restructuring. Economic leakage may occur as residents leave the community to shop or access health care and government services in regional centres. However, Hussar can build upon its strengths to continue to diversify its local economy. The availability of freight train services is not just good news for the local agricultural sector, but may attract other economic activity as well. Therefore, any changes to the CPR branchline will have important effects on the community. Hussar also offers a fairly good range of business services, including the local credit union that provides financial / business consulting in the area.

Furthermore, Hussar has been able to build upon its strengths that have created a sense of community. Hussar has fought hard to maintain educational facilities that provide a foundation to retain families with children. In fact, local students have scored amongst the best in the province of Alberta. The school has also been working to develop new innovative programs to allow students to obtain post-secondary credits and training within their community. Residents have also come together to rebuild the local arena that not only retains youth locally, but is attracting people to book ice time from distant places. Together, these services will go a long way, not just in attracting tourists and economic activity, but also for retaining residents.
